ENERGY SOLUTIONS:
1 - NUCLEAR
2 - RENEWABLES

ENERGY IS A STORY THAT IS STILL BEING WRITTEN. LET'S CONTINUE WRITING IT WITH LESS CO₂.

As a world leader in the nuclear energy business and a significant, growing player in renewable energies, AREVA offers its customers a unique portfolio of innovative, flexible and phased-in solutions for carbon-free energy. But there is more to the story with AREVA's Clean Energy Park. It combines the long-term development of baseload nuclear power with fast-track renewable energy sources (solar, wind or biomass). A great storyline from AREVA to secure the next generation of energy solutions.
