

Thru-Containment Wall Wireless

Upgrade Monitoring & Communication without Penetration Concerns

Every Innovation Has a Mission

One of utilities' top priorities in the 21st century is securing operational excellence. Tangible results that ensure safety, quality, performance and delivery are paramount. Your teams can count on AREVA to deliver innovative solutions that:

- Reduce cost, dose and critical path time
- Increase task safety and efficiency
- Resolve emergent issues quickly
- Improve plant performance

Advanced Equipment Diagnostics

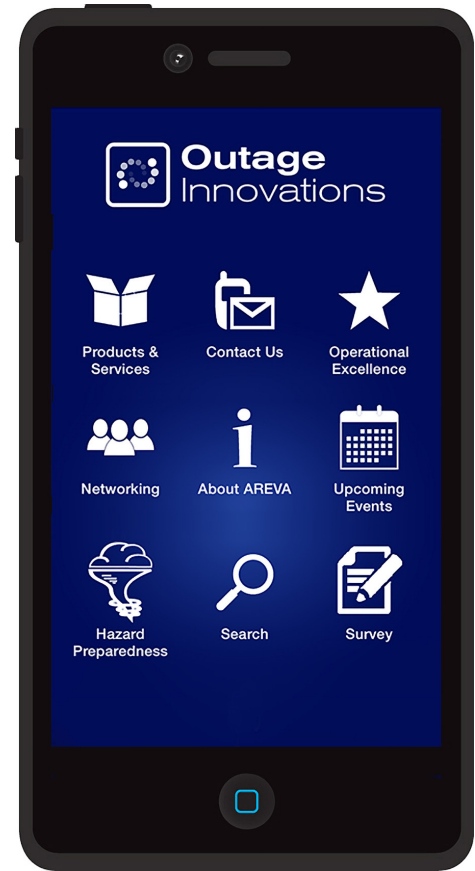

With ever-increasing scrutiny on cyber security, utilities are in search of a solution for upgraded monitoring and communication without the concerns of outside penetration. AREVA's Thru-Containment Wall Wireless system can be utilized as an online plant equipment monitoring system, including RCPs, I&C, and valves to name a few. The system offers automated maintenance scheduling and notifications, and can help you predict equipment failures before an occurrence. You also get off-site advanced troubleshooting capabilities.

Technician Communication System

AREVA's Thru-Containment Wall Wireless System gives you live technical support with subject matter experts via Smart Board Communications, live video and voice interaction, high-definition video review, and technical document upload. This system can be utilized to control robotics and machinery remotely in radiation areas.

Features & Benefits

- Off-site advanced troubleshooting capabilities
- Equipment failure prediction before an occurrence
- Automated maintenance scheduling and notification
- Live technical support with subject matter experts
- Supports high-speed networking infrastructure
- Plug and play compliant
