

Is **Technology**
Leaving You Behind?

A
AREVA
forward-looking energy

It's More Than a Robot Show

Don't Let Technology Leave You Behind

When today's utilities seek Steam Generator Services (SGS), they want to find the right combination of people, performance, technology and price — NOT just another vendor. That's why AREVA's Advancing ECT Inspection, Analysis and Remediation Technology brings you the **All-in-One Plugging / Stabilization Tool**. With the capability to install 10 to 15 plugs per hour, you save on time and dose — simply insert the plug/stabilizer through the pop-up guide tube, rotate the expander into play, and you're in business!

You Get the Whole Package

AREVA's All-in-One Plugging / Stabilization tool performs plugging and stabilization with one tool-head for reduced schedule and dose.

- **One-visit plugging/stabilization to expedite the process**
 - Insert plug/stabilizer through the pop-up guide tube and rotate expander into play
 - Install 10 to 15 plugs per hour
- **Machine vision verification to ensure accuracy**
- **Enhanced software control for efficient operation**
- **Portable integral air system to minimize impact on station resources**

AREVA provides more than the world's most efficient robots:

The latest software; the most advanced probes, continuously improved through substantial R&D; superior data collection, and reliable data interpretation by highly qualified experts. It's all-encompassing attention you can count on.

Every Innovation Has a Mission. To learn more about securing the future of your ECT Inspection, Analysis and Remediation Technology, contact:
