RAM Cask PLUS ... A Turnkey Solution

Nuclear plants need a streamlined turnkey service for the safe and cost-efficient processing, packaging and transport of irradiated reactor components. As part of its commitment to enhanced and client-driven services, AREVA TN is pleased to announce RAM Cask PLUS. Through partners, AREVA TN can now provide the latest design of effective volume reduction processing equipment for use with our new RAM disposal liners. The AREVA TN-owned RAM Cask ensures safe delivery of the disposal package to the available disposal facility.

RAM Cask PLUS includes a team of management and support personnel with extensive years of experience giving you the advantage of decades of "lessons learned" combined with proven technology for safe, low dose and cost-efficient results... another smart solution from AREVA TN that demonstrates our commitment to operational excellence.
